<p>All products offer:</p> <ul style="list-style-type: none"> • SupplyPoint software • 24/7 availability • Reduced product consumption • Improved productivity • Lower inventory costs • Optimised inventory • Convenience and simplicity 	

Standalone

A small form factor PC and a tough capacitive 15 inch touchscreen.

Configurable

The drawers within the ECTC can be configured to provide a selection of different compartments. Upto 22 dividers per drawers.

Compatible & Expandable

Can be expandable by adding additional ECTC cabinets or integrated with other SupplyPoint equipment.

Accountability

The advanced software provides a comprehensive audit trail on item usage.

The ECTC is an ideal entry level inventory management solution providing security to drawer level. Ideal for managing low value, high volume items, like fasteners along with large bulky items. The ECTC utilises the advanced SupplyPoint Lite software which includes a powerful reporting suite that allows companies to keep track of who, what, when, why and how many of the items are held within the ECTC.

COMPATIBLE

The ECTC cabinet can be easily integrated with other SupplyPoint products to provide the most optimum inventory management solution.

UNIQUE MANUAL OVERRIDE FACILITY

A simple, easy to use and resettable manual override ensures that users always have access to the items held within the ECTC cabinet.

PRE CONFIGURED CABINETS

The ECTC is available in 6 different configurations across four different heights. The drawers can be divided into a range of different compartment sizes depending on the items being stored in the drawers.

EXPANDABLE

The ECTC can be a single standalone unit or expanded by adding up to 9 additional ECTC units. It can be seamlessly integrated as part of a broader inventory management solution combining different products from the SupplyPoint range.

HIGH SPEED ACCESS

Rapid search and selection of the items via the SupplyPoint software is further enhanced with an LED identification system which guides the users to the correct location.

EFFICIENCY

Multiple items from different locations can be selected in one transaction minimising the time spent at the ECTC.

TRACEABILITY

The powerful SupplyPoint software provides an audit trail of who has accessed the ECTC and why.

CONFIGURABLE DRAWERS

The ECTC drawers can be configured into a selection of different compartments to suit the items, using one of the divider set packs.

SOFTWARE

The ECTC is managed using the powerful SupplyPoint LITE* software, which provides control over who has access to the items within the cabinet.

*Low Cost Only
