

ECTC

The Electronically Controlled Tool Cabinet marries SupplyPoint's access control to an existing tool cabinet, providing an entry-level product suitable for multiple purposes.

PRODUCT OVERVIEW

Whether you're controlling items for a cell or for a tool crib, ECTC offers drawer-level security capable of managing both large and small items.

Two frame heights and three drawer types that can be subdivided into **as many as 36 easily-reconfigured compartments per drawer** offer a flexible solution for your inventory management needs.

Compartment-level control can be attained through the installation of **up to 36 LIDs** within one or more ECTC drawers, making it a perfect solution for automotive or medical applications.

Using the **VendTel** User Interface, the ECTC Vending Machine can stand alone, join with other ECTC units, or join in installations mixed in with other SupplyPoint Vending Machines to serve your inventory control needs.
